First Quarter Report

December 31, 2015

A Leading Manufacturer and Distributor of Farm Equipment

Management Discussion & Financial Analysis

Certain statements made in the following Management's Discussion and Analysis contain forward-looking statements including, but not limited to, statements concerning possible or assumed future results of operations of Buhler Industries Inc. (the Company). Forward-looking statements represent the Company's intentions, plans, expectations and beliefs, and are not guarantees of future performance. Such forward-looking statements represent the Company's current views based on information as at the date of this report. They involve risks, uncertainties and assumptions and the Company's actual results could differ, which in some cases may be material, from those anticipated in these forward-looking statements. Unless otherwise required by applicable securities law, the Company disclaims any intention or obligation to publicly update or revise this information, whether as a result of new information, future events or otherwise. The Company cautions investors not to place undue reliance upon forward-looking statements.

Company Overview

The Company is headquartered in Winnipeg, Manitoba, Canada. Established in 1932 as an agricultural equipment manufacturer, the original company was purchased by John Buhler in 1969. Through expansion, new products and acquisitions, the Company has experienced progress and steady growth.

Over the years, many brands have joined Buhler Industries: Farm King, Ezee-On, Allied, Inland and Versatile. Today the Company operates several modern manufacturing plants and distribution centers. Factories in Morden and Winnipeg (Manitoba), Vegreville (Alberta), Fargo (North Dakota), Salem (South Dakota) and Willmar (Minnesota) build tractors, sprayers, front-end loaders, augers, snow blowers, mowers, seeding and tillage equipment, compact implements and more. In addition, the Company maintains several well-stocked parts warehouses.

In 2007, Combine Factory Rostselmash Ltd, a major combine manufacturer located in Rostov-on-Don, Russia, acquired 80% of the common shares of the Company. The Company continues to grow with additional investment in engineering, research and development and production. The dealer/distribution network in North America remains steady, however the Rostselmash network adds more than 200 dealers in Russia, Ukraine and Kazakhstan that provides for additional sales growth into the future.

Buhler Industries remains committed to continuous product improvement and incorporating new value-added features. That tradition of excellence will continue well into the future.

In this table, IFRS refers to the International Financial Reporting Standards. GAAP refers to the Canadian Generally Accepted Accounting Principles that were the standard until 2011.

Management Discussion & Financial Analysis

General Information

The following discussion and analysis dated February 10, 2016 was prepared by management and should be read in conjunction with the consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS). The following discussion and analysis is presented in millions of Canadian dollars except where otherwise noted. The consolidated financial statements include the accounts of all subsidiaries. All subsidiaries in the United States operate with the U.S. dollar as the functional currency, while the Company and all its Canadian subsidiaries operate with the Canadian dollar as the functional currency.

Highlights

Revenue

Revenue for the quarter was \$36.3, down from \$60.1 in the first quarter of 2015. Weak commodity prices continue to contribute to reduced sales levels for the Company. Sales in North America have declined from the prior years, particularly in the US. Sales to Eastern Europe have increased significantly.

Sales (millions C\$)

Gross Profit

Gross profit for the quarter was (\$4.1) compared with \$7.1 in the first quarter of the prior year. As a percentage of sales, gross profits were (11.4%) a decrease from the 11.9% realized in same period of 2015. Gross profit declined as sales discounts were increased resulting from a highly competitive market for sales of farm equipment and reduced efficiencies in manufacturing resulting from the reduced production levels. Finally and most significantly, the high level of Canadian sales has been negatively offset by the unfavorable exchange rate on purchases made in US dollars.

Gross Profit (millions C\$)

Income from Operations

Income from operations came in at (\$13.4), a decrease from \$(2.7) seen in the prior year's first quarter, primarily due to the decrease in gross profit. Selling and administration expenses were \$6.2, down from the prior year's first quarter of \$6.9. As a percentage of sales, selling and administration was 17.1%, up from the prior year percentage of 11.4%, principally due to the decrease in revenue.

Income from Operations (millions C\$)

Net Earnings

The net loss for the quarter was (\$8.7), compared with last year's first quarter income of \$1.5, mainly driven by the decreased margin and a recovery of income taxes relating to prior years that did not repeat in the current year. Partially offsetting these was a \$0.7 reduction in selling and administration expenses.

Net Earnings (millions C\$)

EBITDA

EBITDA is the earnings before interest, income taxes, depreciation and amortization, and is considered to be a useful measure of the cash flow from operations of the Company. EBITDA for 2016 was (\$11.7), down from the prior year's first quarter of (\$0.9). The decrease was due primarily to the decrease in income from operations.

EBITDA (millions C\$)

Management Discussion & Financial Analysis

Working Capital

Working capital is a measure of company's ability to discharge its current obligations by using its current assets. The Company continues to be in a strong position as the working capital at quarter end was \$118.5, down \$28.4 from same period in the prior year. Accounting for the much of the change were decreases in accounts receivable of \$29.0 and inventories of \$7.0 and increases in bank indebtedness of \$2.2, offset by increases in income taxes receivable/payable of \$3.8 and decreases in accounts payable and accrued liabilities of \$4.3.

Working Capital (millions C\$)

Research and Development

Consistent with the Company's strategy over the past several years, the Company continues to invest in the development of new products for the future so expenditures for research and development continued to be high. In the first quarter of 2016 the Company spent \$1.9, consistent with the prior year first quarter. Management believes this strategy will maintain the Company's competitive position in the marketplace.

Quarterly Net Earnings Results (000's C\$)

| | 2012 | 2013 | 2014 | 2015 | 2016 |
|-------|-----------|-----------|-----------|------------|------------|
| 1st Q | \$ 2,364 | \$ 3,303 | \$ 4,745 | \$ 1,512 | \$ (8,694) |
| 2nd Q | 4,150 | 6,426 | 4,972 | 387 | |
| 3rd Q | 6,754 | 8,378 | 1,108 | 264 | |
| 4th Q | 3,095 | 1,784 | 1,633 | (7,479) | |
| Total | \$ 16,363 | \$ 19,891 | \$ 12,458 | \$ (5,316) | \$ (8,694) |

Net Quarterly Income (millions C\$)

Summary of Quarterly Results

Sales for the first quarter declined, mostly due to the decline in demand for tractors in the North American market, especially the United States. Revenue for the fourth quarter of \$36.3 generated a gross profit of (\$4.1) and net earnings of (\$8.7). With the decreased sales levels in the quarter, the Company experienced lower gross margins. Offsetting this was decreased selling and administration costs.

Cash Flow and Capital Resources

Operating Activities

Cash for the quarter was down \$22.3 from September 30, 2015, coming in at an indebtedness of \$75.2. Net loss of (\$8.7), increases in inventories of \$10.6 and income taxes receivable/payable of \$3.8 were offset by collections of accounts receivable of \$19.5 and decreases in accounts payable of \$15.1.

Net Cash Flow (millions C\$)

Inventory Turns

Management has diligently worked to control the investment in inventory in order to keep a strong cash position. In order to meet an expected demand in tractors, the company has increased its inventory of finished units. This, coupled with the decline in sales, has led to a drop in the inventory turns, going from 0.97 in the first quarter of 2015 to the current year's 0.76, a drop of 21.2%. Management expects this ratio to improve throughout the year.

Management Discussion & Financial Analysis

Investing Activities

Cash used during the quarter for investing activities was \$0.5, compared to \$0.9 in the first quarter of 2015. These investing activities were comprised solely of capital purchases, with minor amounts received for the sale of excess assets.

Asset Purchases (millions C\$)

Financing Activities

The Company had an inflow of cash during the quarter of \$0.1 for foreign exchange. This compares to the first quarter of 2015 where the Company saw an outflow of \$0.4 for repayment of long term debt offset by foreign exchange of \$0.3 for a net outflow of \$0.1.

Resources

In order for the Company to operate and grow, continued funding resources are required. The Company has several options for funding available to it such as cash in the bank, cash provided by operations and acquiring new debt. Under the current agreements in place, the Company has access to \$110.0 Canadian in credit facilities.

Risks and Financial Instruments

The Company recognizes that net earnings are exposed to changes in market interest rates, foreign exchange rates, prices of raw materials and risks regarding the financial condition of customers. These market conditions are regularly monitored and actions are taken when appropriate. Despite the methods employed to manage these risks, future fluctuations in interest rates, exchange rates, raw material costs and customers condition can be expected to impact net earnings.

The Company may enter into fixed-rate debt to minimize the risk associated with interest rate fluctuations. In addition, the Company may employ hedging programs to minimize foreign exchange risks associated with the changes in the value of the Canadian dollar relative to the U.S. dollar. To the extent possible, the Company maximizes natural currency hedging by matching inflows from sales in either currency with outflows of costs and expenses denominated in the same currency. A portion of the remaining exposure to fluctuations in exchange rates may be mitigated with forward and option contracts.

The Company currently has a variable interest bank credit facility and a low interest loan from Heloval Holdings Ltd. Should future cash requirements result in additional debt be taken on, management would evaluate the financing options available at that time and take a course of action that is in the best interests of the Company in the long term. Currently, all of the financing needs of the Company are being met by the bank credit facility, which carries a low rate of variable interest.

With respect to foreign exchange, the Company manages risk by use of the natural hedge that exists between the U.S. dollar denominated accounts receivables and accounts payable. Where a large difference in this hedge is anticipated, forward foreign exchange contracts may be entered into to mitigate the risk. Purchases of foreign exchange products for the purpose of speculation are not permitted. Transactions are only conducted with certain approved financial institutions. Fluctuations in foreign exchange rates represent a material exposure for the Company's financial results. Hedging programs employed may mitigate a portion of exposures to short-term fluctuations in foreign currency exchange rates. The Company's financial results over the long term will be affected by sizeable changes in the value of the Canadian dollar relative to the U.S. dollar.

Credit risk arises from cash held with banks and credit exposure to customers, including outstanding accounts receivable. The Company assesses the credit quality of customers, taking into account their financial position, past experience and other factors. Management regularly monitors customer credit limits, performs credit reviews and, in certain cases, insures accounts receivable balances against credit losses. Nonetheless, unexpected deterioration in the financial condition of a customer can have a negative impact on net earnings in the case of default.

Management Discussion & Financial Analysis

Looking Forward

Sales for the second and third quarter are expected to be higher than first quarter sales. Sales and profitability for the year are still expected to be off 2015 levels as demand for agricultural equipment continues to be weaker in 2016 as a result of lower commodity prices. Inventory levels are expected to drop in 2016 boosting cash flow. Gross margin and operating margin are expected to be lower due reduced production efficiencies created by lower sales. In addition, increased competition for equipment sales will lead to lower margins due to additional sales programs being added. Finally, the weaker Canadian dollar continues to have a significant negative impact on the Company with parts purchased in US dollars with the majority of sales projected to be done in Canada during the year.

Critical Accounting Estimates

The Company believes the following accounting estimates are critical to determining and understanding the operating results and the financial position of the Company.

Allowance for doubtful accounts. The Company estimates allowances for potential losses resulting from the inability of customers to make required payments of accounts receivable. Additional allowances may be required if the financial condition of any customer deteriorates.

Allowance for inventory obsolescence. The Company estimates allowances for potential losses resulting from inventory becoming obsolete and that cannot be processed and/or sold to customers. Additional allowances may be required if the physical condition of inventory deteriorates or customer requirements change.

Impairment of property, plant and equipment and intangible assets. An integral component of impairment testing is determining the asset's recoverable amount. The determination of the recoverable amount involves significant management judgment, including projections of future cash flows and the appropriate discount rates. The cash flows are derived from financial forecasts and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance. Qualitative factors, including market presence and trends, strength of customer relationships, strength of local management, strength of debt and capital markets, and degree of variability in cash flows, as well as other factors, are considered when making assumptions with regard to future cash flows and the appropriate discount rate. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes. A change in any of the significant assumptions or estimates could result in a material change in the recoverable amount.

Contingencies and litigation. Should a lawsuit or claim be brought against the Company, management would assesses the potential financial exposure of the Company. In assessing any probable losses, the amount of possible insurance recoveries will be projected. The Company accrues such liabilities when a loss becomes probable and the net amount of the loss can reasonably be estimated. Due to the inherent uncertainties relating to the eventual outcome of litigation and potential insurance recovery, certain matters could ultimately be resolved for amounts materially different to provisions or disclosures previously made by the Company.

Management Discussion & Financial Analysis

Critical Accounting Estimates - continued

Warranty obligation. The Company offers warranties for its sale of equipment. Management estimates the related provision for future warranty claims based on historical warranty claim information, as well as recent trends that might suggest that past cost information may differ from future claims.

Factors that could impact the estimated claim information include the success of the Company's productivity and quality initiatives, as well as parts and labor costs.

Income taxes. Estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income before they expire. The Company's assessment is based upon existing tax laws and estimates of future taxable income. If the assessment of the Company's ability to utilize the underlying future tax deductions changes, the Company would be required to recognize more or fewer of the tax deductions as assets, which would decrease or increase the income tax expense in the period in which this is determined.

The Company makes claims for Scientific Research and Experimental Development (SRED) expenditures which are included in deferred taxes. The amounts recorded are based on the Company's interpretation of the Income Tax Act of Canada provisions which govern the eligibility of SRED costs. The claims may be subject to review by the Canada Revenue Agency (CRA) before refunds are received. Actual collection may be materially different than what is recorded in the financial statements. The Company is currently challenging CRA in court in regards to certain of its SRED credits and believes that it will be successful in defending its SRED claim. The Company's SRED credits are recorded on the balance sheet after review of the relevant accounting pronouncements.

The Company is subject to taxation in multiple jurisdictions. Significant judgment is required in determining the worldwide provision for taxation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company maintains provisions for uncertain tax positions that it believes appropriately reflect its risk with respect to tax matters under active discussion, audit, dispute or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions for uncertain tax positions are made using management's best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. Management reviews the adequacy of these provisions at each consolidated balance sheet date. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

The operations and organizational structure of the Company are complex, and related tax interpretations, regulations and legislation are continually changing. As a result, there are usually some tax matters in question that result in uncertain tax positions. The Company approaches uncertain tax positions from a liability or exposure perspective. The Company provides for future liabilities in respect of uncertain tax positions where additional tax may become payable in future periods and such provisions are based on management's assessment of exposures.

Management Discussion & Financial Analysis

Critical Accounting Estimates - continued

Disclosure Controls and Internal Controls

Disclosure Controls

Management is responsible for establishing and maintaining disclosure controls and procedures in order to provide reasonable assurance that material information relating to the Company is made known to them in a timely manner and that information required to be disclosed is reported within time periods prescribed by applicable securities legislation. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based on management's evaluation of the design and effectiveness of the Company's disclosure controls and procedures, the Company's Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are designed and operating effectively as of September 30, 2015 to provide reasonable assurance that the information being disclosed is recorded, summarized and reported as required.

Internal Controls Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Internal control systems, no matter how well designed, have inherent limitations and therefore can only provide reasonable assurance as to the effectiveness of internal controls over financial reporting, including the possibility of human error and the circumvention or overriding of the controls and procedures. Based on management's design and testing of the effectiveness of the Company's internal controls over financial reporting, the Company's Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are designed and operating effectively as of December 31, 2015 to provide reasonable assurance that the financial information being reported is materially accurate. During the period ended December 31, 2015, there have been no changes in the design of the Company's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, its internal controls over financial reporting.

Notes to Consolidated Financial Statements

1. Basis of Operations

Buhler Industries Inc. (the Company) was incorporated under the laws of Canada on February 1, 1994. On March 24, 1994 the Company was listed and posted for trading on the TSX under the stock exchange symbol "BUI". The address of the registered office is 1260 Clarence Avenue, Winnipeg, Manitoba.

The Company, through its subsidiaries and a joint venture, has manufacturing and warehousing facilities in Canada and the United States of America (U.S.). The Company produces farm equipment for sale in Canada, U.S. and overseas.

2. Basis of Presentation

The Company prepares its consolidated financial statements in accordance with International Financial Reporting Standards.

The Company's functional currency is the Canadian dollar. The Canadian dollar is the reporting currency as much of the Company's business, as well as the majority of the Company's financing, is conducted in Canadian dollars.

The consolidated financial statements have been prepared under the historical-cost convention, except that certain financial instruments are stated at their fair value.

The consolidated financial statements were approved by the Board of Directors on February 10, 2016.

3. Significant Accounting Policies

(a) Basis of consolidation

The consolidated financial statements include the accounts of the Company and its active wholly-owned subsidiaries, Buhler Versatile Inc., Buhler Trading Inc., Buhler Ezee-On Inc., B.I.I. Fargo, Inc., Buhler Versatile (USA) Inc., Implement Sales Co. Inc., Haskett Properties Inc., ISCO Inc., Progressive Manufacturing Ltd., John Buhler Inc., Ezee-On (USA) Ltd., Amarillo Service and Supply Inc., Buhler Finance Inc. and McDermott Parkade Inc. Control exists when the Company has the power to govern the financial and operating policies so as to obtain benefits from its activities. The Company holds 100% of the voting rights of the subsidiaries, and therefore controls these entities. The financial statements of all subsidiaries are prepared as of the same reporting date using consistent accounting policies. All inter-company balances and transactions, including any unrealized profits arising from inter-company transactions have been eliminated.

(b) Business combinations

Business combinations are accounted for using the acquisition method of accounting. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred by the former owners of the acquiree and the equity interests issued by the Company. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition costs incurred are expensed and included in general and administrative expenses. Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability will be recognized in accordance with IAS 39 either in the statement of income or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. Goodwill is initially measured as the excess of the aggregate of the consideration transferred over the net identifiable assets acquired and liabilities assumed. If this consideration is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the statement of income.

(c) Foreign currency translation

The functional currency for each of the Company's subsidiaries is the currency of the primary economic environment in which the entity operates. Transactions in foreign currencies are translated to the respective functional currencies of each entity within the consolidated group using the exchange rates in effect at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rates prevailing at the end of the reporting period. Nonmonetary items measured at historical cost in a foreign currency are translated to the functional currency using the exchange rate prevalent at the date of acquisition. Non-monetary items denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate prevalent at the date that the fair value was determined. Foreign currency differences arising from translation are recognized in net income, except for exchange differences arising on the translation of financial instruments qualifying as a cash flow hedge, which are recognized directly in other comprehensive income ("OCI").

(d) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable, net of estimated returns, rebates and discounts, and after the elimination of intercompany sales. Revenue is recognized when the risks and rewards of ownership have transferred to the customer. No revenue is recognized if there are significant uncertainties regarding recovery of the consideration due, the costs incurred or to be incurred cannot be measured reliably, or there is continuing management involvement with the goods. Interest income is recognized as earned. Management uses historical experience to estimate and provide for discounts and returns. Volume rebates are assessed based on annual purchases.

3. Significant Accounting Policies - continued

(e) Inventories

Inventories are stated at the lower of cost and net realizable value. The cost of inventories is based on the first-in first-out principle and includes expenditures incurred in acquiring the inventories and bringing them to their existing location and condition. In the case of manufactured inventories, cost includes an appropriate share of variable and fixed overheads based on normal operating capacity. Any excess, unallocated, fixed overhead costs are expensed as incurred. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Inventories are written down to net realizable value if net realizable value declines below carrying amount. When circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in selling price, the amount of the write-down previously recorded is reversed.

(f) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. Cost includes any directly attributable costs, borrowing costs on qualifying construction projects, and the costs of dismantling and removing the items and restoring the site on which they are located. When major components of an item of property and equipment have different useful lives, they are accounted for as separate items. Depreciation is calculated using the following methods to allocate the cost of assets less their residual values over their estimated useful lives as follows:

| | | |
|--------------------|------------|-------------------|
| Buildings | 4 to 5% | Straight line |
| Equipment | 20 to 100% | Declining balance |
| Computer equipment | 30 to 100% | Declining balance |

Depreciation methods, useful lives and residual values are reviewed at each reporting date. Assets under construction and land are not depreciated.

Leases of property, plant and equipment on terms that transfer substantially all of the benefits and costs of ownership are accounted for as finance leases. All other leases of property, plant and equipment are accounted for as operating leases.

(g) Intangible assets

Intangible assets are stated at cost less accumulated amortization and any impairment losses.

Amortization is computed using the straight-line method over the estimated useful lives of the assets, as follows:

| | |
|----------------------------|-----------------------|
| Customer lists and patents | 5 year, straight line |
|----------------------------|-----------------------|

(h) Income taxes

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of comprehensive income except to the extent that it relates to items recorded directly to equity, in which case it is recognized directly in equity.

Current income tax expense is the expected income tax payable on the taxable income for the period, using income tax rates enacted or substantively enacted in the jurisdictions the Company is required to pay income tax at the reporting date, and any income adjustments to income taxes payable in respect of previous periods. Current income tax expense is adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and by the availability of unused income tax losses.

Deferred tax expense is recognized using the balance sheet method in which temporary differences are calculated based on the carrying amounts of assets and liabilities for financial reporting purposes and the tax bases of assets and liabilities for income taxation purposes. Deferred tax is not recognized for the following temporary timing differences: the initial recognition for both goodwill and assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable income; and differences relating to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future. Deferred tax is measured at the income tax rates that are expected to be applied when the temporary difference reverses, that is, when the asset is realized or the liability is settled, based on the income tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets are recognized only to the extent that it is probable that future taxable income will be available against which the assets can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related income tax benefit will be realized.

Current tax assets and liabilities are offset when the Company and its subsidiaries have a legally enforceable right to offset the amounts and intend to either settle on a net basis, or to realize the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset and when the deferred tax balances relate to the same income tax authority.

(i) Research and development expenses

The company expenses all research costs as they are incurred unless they meet the criteria for deferral in accordance with IAS 38 Intangible Assets. No such development costs have been deferred to date.

Notes to Consolidated Financial Statements

3. Significant Accounting Policies - continued

(j) Interest in joint ventures and other entities

The company accounts for its interest in joint ventures using the equity method. Interests in other entities where there is no significant influence are recorded at fair value

(k) Cash/bank indebtedness

Cash/bank indebtedness includes cash on hand, bank overdrafts and bankers acceptances. Bank overdrafts are repayable on demand. Bank overdrafts and bankers acceptances form an integral part of the Company's cash management and are included as a component of cash/bank indebtedness for the purpose of the statement of cash flows.

(l) Financial Instruments

Under IFRS, financial instruments are classified into one of the following five categories: fair value through profit or loss (FVTPL), held to maturity investments, loans and receivables, available-for-sale financial assets, or other financial liabilities. All financial instruments, including derivatives, are included on the consolidated balance sheet, which are measured at fair value except for loans and receivables, held-to-maturity investments and other financial liabilities, which are measured at amortized cost.

The Company's financial instruments are classified as follows: a) cash and cash equivalents (bank indebtedness) - loans and receivables, b) accounts and other receivables - loans and receivables c) accounts payable and accrued liabilities - other financial liabilities, d) interests in other entities - fair value through profit and loss, e) derivatives - fair value through profit and loss and f) long term debt - other liabilities. All financial instruments are included in the consolidated balance sheet and are measured at fair value except loans and receivables and other financial liabilities, which are measured at amortized cost.

All changes in fair value are recorded to the statement of comprehensive income unless cash flow hedge accounting is used, in which case changes in fair value are recorded in other comprehensive income.

The Company's policy is not to utilize derivative financial instruments for trading or speculative purposes. The Company may utilize derivative instruments in the management of its foreign currency and interest rate exposures.

FVTPL financial instruments are subsequently measured at fair value and all gains and losses are included in net income in the period in which they arise. Available-for-sale financial instruments are subsequently measured at fair value with revaluation gains and losses included in other comprehensive income until the instrument is derecognized or impaired.

(m) Derivative financial Instruments

The Company operates principally in Canada and the United States, which gives rise to risks that its income and cash flows may be adversely impacted by fluctuations in foreign exchange rates. The Company enters into foreign currency forward contracts to manage foreign exchange exposures on accounts receivable expected to be recovered in US dollars.

The fair value of each contract is included on the consolidated balance sheet within derivative financial instrument assets or liabilities, depending on whether the fair value was in an asset or liability position. Changes in fair value are recognized in the consolidated statement of comprehensive income through gains/losses on foreign exchange.

(n) Comprehensive Income

Comprehensive income includes all changes in equity of the Company, except those resulting from investments by shareholders and dividends paid. Comprehensive income is the total of net income and other comprehensive income. Other comprehensive income comprises revenues, expenses, gains and losses that require recognition, but are excluded from net income. The Company does not have any items giving rise to other comprehensive income, nor is there any accumulated balance of other comprehensive income. All gains and losses, including those arising from measurement of all financial instruments have been recognized in net income for the year.

(o) Impairment

Impairment of non-financial assets

Tangible assets and definite life intangible assets are reviewed at each balance sheet date to determine whether events or conditions indicate that their carrying amount may not be recoverable. If any such indication exists, the recoverable amount of the asset, which is the higher of its fair value less costs to sell and its value in use, is estimated in order to determine the extent of the impairment loss. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit (CGU) to which the asset belongs. For tangible and intangible assets excluding goodwill, the CGU is the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets.

Impairment of financial assets

Financial assets are assessed at each reporting date to determine whether there is any objective evidence that they are impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset. An impairment loss is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at their original effective interest rate. All impairment losses are recognized in the consolidated statement of comprehensive income. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized.

4. Critical Accounting Estimates and Judgments

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates may, by definition, not equal the actual results. The estimates and assumptions that are critical to the determination of carrying value of assets and liabilities are addressed below.

(a) Allowance for doubtful accounts:

The Company estimates allowances for potential losses resulting from the inability of customers to make required payments of trade receivables. Additional allowances may be required if the financial condition of any customer deteriorates.

(b) Allowance for inventory obsolescence:

The Company estimates allowances for potential losses resulting from inventory becoming obsolete and that cannot be processed and/or sold to customers. Additional allowances may be required if the physical condition of inventory deteriorates or customer requirements change.

(c) Impairment of property, plant and equipment and intangible assets:

An integral component of impairment testing is determining the asset's recoverable amount. The determination of the recoverable amount involves significant management judgment, including projections of future cash flows and the appropriate discount rates. The cash flows are derived from financial forecasts and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance. Qualitative factors, including market presence and trends, strength of customer relationships, strength of local management, strength of debt and capital markets, and degree of variability in cash flows, as well as other factors, are considered when making assumptions with regard to future cash flows and the appropriate discount rate. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes. A change in any of the significant assumptions or estimates could result in a material change in the recoverable amount.

No impairment losses were recognized in the first quarter of fiscal years 2016 or 2015.

(d) Income taxes

Estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income before they expire. The Company's assessment is based upon existing tax laws and estimates of future taxable income. If the assessment of the Company's ability to utilize the underlying future tax deductions changes, the Company would be required to recognize more or fewer of the tax deductions as assets, which would decrease or increase the income tax expense in the period in which this is determined.

The Company makes claims for Scientific Research and Experimental Development (SRED) expenditures which are included in deferred taxes. The amounts recorded are based on the Company's interpretation of the Income Tax Act of Canada provisions which govern the eligibility of SRED costs. The claims may be subject to review by the Canada Revenue Agency (CRA) before refunds are received. Actual collection may be materially different than what is recorded in the financial statements. The Company is currently challenging CRA in court in regards to certain of its SRED credits and believes that it will be successful in defending its SRED claim. The Company's SRED credits are recorded on the balance sheet after review of the relevant accounting pronouncements (note 11).

The Company is subject to taxation in multiple jurisdictions. Significant judgment is required in determining the worldwide provision for taxation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company maintains provisions for uncertain tax positions that it believes appropriately reflect its risk with respect to tax matters under active discussion, audit, dispute or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions for uncertain tax positions are made using management's best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. Management reviews the adequacy of these provisions at each consolidated balance sheet date. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

The operations and organizational structure of the Company are complex, and related tax interpretations, regulations and legislation are continually changing. As a result, there are usually some tax matters in question that result in uncertain tax positions. The Company approaches uncertain tax positions from a liability or exposure perspective. The Company provides for future liabilities in respect of uncertain tax positions where additional tax may become payable in future periods and such provisions are based on management's assessment of exposures.

(e) Provision for warranty costs

The Company offers warranties for its sale of equipment. Management estimates the related provision for future warranty claims based on historical warranty claim information, as well as recent trends that might suggest that past cost information may differ from future claims.

Factors that could impact the estimated claim information include the success of the Company's productivity and quality initiatives, as well as parts and labor costs.

Notes to Consolidated Financial Statements

5. Future Accounting Standards

The following recently issued accounting pronouncements represent a summary of the pronouncements that are likely to, or may at some future time, have an impact on the Company.

(a) Financial Instruments

IFRS 9 "Financial Instruments" was issued in November 2009, introducing new requirements for the classification and measurement of financial assets. IFRS 9 was amended in October 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition. IFRS 9, which has yet to be adopted, retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flow of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument. With regard to the measurement of financial liabilities designated as fair value through profit or loss, IFRS 9 requires that the amount of the change in the fair value of the financial liability, that is attributable to changes in the credit risk of that liability, is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in the statement of income. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to the statement of income. Previously, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss was presented in the statement of income. In November 2013, a new general hedge accounting standard was issued, forming part of IFRS 9. It will more closely align with risk management. This new standard does not fundamentally change the types of hedging relationships or the requirement to measure and recognize ineffectiveness, however it will provide more hedging strategies that are used for risk management to qualify for hedge accounting and introduce more judgment to assess the effectiveness of a hedging relationship. Another revised version of IFRS 9 was issued in July 2014 mainly to include i) impairment requirements for financial assets and ii) limited amendments to the classification and measurement requirements by introducing a fair value through other comprehensive income measurement category for certain simple debt instruments. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Company is currently assessing the impact of this new standard and does not intend to early adopt IFRS 9 in its consolidated financial statements.

(b) Revenue From Contracts With Customers

IFRS 15 "Revenue From Contracts With Customers" was issued in May 2014, specifying the steps and timing for recognizing revenue. The new standard also requires more informative, relevant disclosures. IFRS 15 supersedes IAS 11 "Construction Contracts" and IAS 18 "Revenue", as well as various IFRIC and SIC interpretations regarding revenue. IFRS 15 is effective for annual periods beginning on or after January 1, 2017 with early adoption permitted. The Company is currently assessing the impact of this new standard and does not intend to early adopt IFRS 15 in its consolidated financial statements.

(c) Property, Plant and Equipment and Intangibles

Amendments to IAS 16 "Property, Plant and Equipment" and IAS 38 "Intangible Assets" were issued in May 2014, prohibiting the use of revenue based depreciation for property, plant and equipment and significantly limiting the use of revenue-based amortization for intangible assets. These amendments are effective for annual periods beginning on or after January 1, 2016 and are to be applied prospectively. The Company does not expect the amendments to have any impact on its consolidated financial statements.

(d) Financial Statement Presentation

Amendments to IAS 1 "Presentation of Financial Statements" were issued in December 2014 as part of the IASB's major initiative to improve presentation and disclosure in financial reports. These amendments are effective for annual periods beginning on or after January 1, 2016 with early adoption permitted. The Company is currently assessing the impact of these amendments.

6. Credit Facilities (000's C\$)

The Company has available a financing facility in the amount of \$110,000. This facility is a one year revolving line of credit shared under a club agreement between the Bank of Montreal and the Bank of Nova Scotia. The credit facility is secured by a general security agreement and assignment of specific receivables and inventory in Canada and the US. The financing facility is at Bankers Acceptance and/or LIBOR rates plus stamping fees. At December 31, 2015, the amount drawn on this facility is \$75,158 (September 30, 2015 - \$64,723). Cash balances of \$830 (September 30, 2015-\$11,893) have been netted with the facility.

7. Inventories (000's C\$)

| | Dec. 31 2015 | Sept. 30 2015 |
|-----------------|-------------------|-------------------|
| Raw materials | \$ 50,816 | \$ 49,933 |
| Work in process | 7,486 | 5,532 |
| Finished goods | 153,739 | 145,998 |
| | \$ 212,041 | \$ 201,463 |

During the period, inventories in the amount of \$25,270 (2015 - \$34,822) were expensed to cost of sales.

The carrying value of inventories is pledged as security against the Company's credit facilities.

8. Property, Plant and Equipment (000's C\$)

| | Land | Buildings | Equipment | Computer equipment | Total |
|--|-----------------|------------------|-----------------|-----------------------|------------------|
| Cost | \$ 3,575 | \$ 26,571 | \$ 57,299 | \$ 7,150 | \$ 94,595 |
| Accumulated depreciation Sept. 30, 2014 net book value | - | (15,609) | (47,707) | (6,478) | (69,794) |
| | 3,575 | 10,962 | 9,592 | 672 | 24,801 |
| Additions | - | 1,236 | 1,086 | 409 | 2,731 |
| Disposals | - | - | (117) | - | (117) |
| Depreciation Sept. 30, 2015 net book value | - | (874) | (3,248) | (476) | (4,598) |
| | 3,575 | 11,324 | 7,313 | 605 | 22,817 |
| Additions | - | 14 | 505 | 31 | 550 |
| Disposals | - | - | (37) | - | (37) |
| Depreciation Dec. 31, 2015 net book value | - | (225) | (570) | (49) | (844) |
| | \$ 3,575 | \$ 11,113 | \$ 7,211 | \$ 587 | \$ 22,486 |

Recorded as:

| | Land | Buildings | Equipment | Computer equipment | Total |
|--|-----------------|------------------|-----------------|-----------------------|------------------|
| Cost | \$ 3,575 | \$ 27,807 | \$ 57,681 | \$ 7,559 | \$ 96,622 |
| Accumulated depreciation Sept. 30, 2015 net book value | - | (16,483) | (50,368) | (6,954) | (73,805) |
| | \$ 3,575 | \$ 11,324 | \$ 7,313 | \$ 605 | \$ 22,817 |
| Cost | \$ 3,575 | \$ 27,821 | \$ 58,034 | \$ 7,590 | \$ 97,020 |
| Accumulated depreciation Dec. 31, 2015 net book value | - | (16,708) | (50,823) | (7,003) | (75,534) |
| | \$ 3,575 | \$ 11,113 | \$ 7,211 | \$ 587 | \$ 22,486 |

The Company reviewed its property, plant and equipment for indicators of impairment. No assets were identified as impaired.

Included in property, plant and equipment is \$279 of equipment not being depreciated as the assets are not yet in use (September 30, 2015 - \$244).

9. Intangible Assets (000's C\$)

The Company's intangible assets consist of customer lists and patents.

| | Total |
|--------------------------------------|-------------|
| Cost | \$ 426 |
| Accumulated amortization | (341) |
| Sept. 30, 2014 net book value | 85 |
| Amortization | (85) |
| Sept. 30, 2015 net book value | - |
| Amortization | - |
| Dec. 31, 2015 net book value | \$ - |

Recorded as:

| | Total |
|--------------------------------------|-------------|
| Cost | \$ 426 |
| Accumulated depreciation | (426) |
| Sept. 30, 2015 net book value | \$ - |
| Cost | \$ 426 |
| Accumulated depreciation | (426) |
| Dec. 31, 2015 net book value | \$ - |

The Company reviewed its intangible assets for indicators of impairment. No assets were identified as impaired.

Notes to Consolidated Financial Statements

10. Long Term Receivables (000's C\$)

| | Dec. 31 2015 | Sept. 30 2015 |
|--|-----------------|------------------|
| Current portion (incl. in accounts receivable) | \$ - | \$ - |
| Long term receivables | <u>2,187</u> | <u>2,187</u> |
| | \$ 2,187 | \$ 2,187 |

Long term receivables are secured by property. The receivable carries interest at 5.00% due October 2017.

Amounts to be received over the next five years are as follows:

| | |
|------|--------|
| 2016 | \$ Nil |
| 2017 | 2,187 |
| 2018 | Nil |
| 2019 | Nil |
| 2020 | Nil |

11. Income Taxes (000's C\$)

| | Q1 2016 | Q1 2015 |
|--|-------------------|-------------------|
| Current year | \$ (1,124) | \$ 1,082 |
| Adjustment for prior years | <u>(40)</u> | <u>(2,994)</u> |
| Current income tax provision | \$ (1,164) | \$ (1,912) |
| Origination and reversal of timing differences | \$ (3,342) | \$ (2,099) |
| SR&ED credits earned | <u>(202)</u> | <u>(214)</u> |
| Deferred tax recovery | \$ (3,544) | \$ (2,313) |
| Combined Canadian federal and provincial income tax rate | 27.0% | 27.0% |
| Foreign tax rate differences applied to profits (losses) | 2.9 | 11.6 |
| Adjustments for prior years | - | 108.1 |
| SR&ED credits earned | 1.5 | 7.7 |
| Non-taxable foreign exchange | 1.8 | 4.7 |
| Non-taxable portion of gain (loss) on disposal of assets | 0.0 | 0.3 |
| Foreign exchange effect on foreign future tax assets | (3.5) | (9.6) |
| Permanent differences and other | <u>5.4</u> | <u>5.9</u> |
| Effective income tax rate | 35.1% | 155.7% |

Income taxes paid during the period were \$2,506 (Q1 2015 - \$3,165).

Deferred income taxes are recorded to reflect the timing differences arising from deduction of warranty costs for income tax purposes, the amounts of depreciation and amortization provided in the year compared to the allowances deducted for income tax purposes, taxable losses carried forward to future periods, expected Scientific Research and Experimental Development (SRED) tax credit claims and other temporary timing differences.

The following are the components of the deferred tax assets and liabilities recognized by the Company:

| | Dec. 31 2015 | Sept. 30 2015 |
|--|------------------|------------------|
| Deferred income tax assets | | |
| Property, plant, equipment and intangibles | \$ 3 | \$ 66 |
| Warranty | 3,757 | 3,713 |
| SRED credits | 8,718 | 8,516 |
| Taxable losses carried forward to future periods | 16,289 | 12,505 |
| Temporary timing differences | <u>3,278</u> | <u>3,223</u> |
| | \$ 32,045 | \$ 28,023 |
| Deferred income tax liabilities | | |
| Property, plant, equipment and intangibles | Dec. 31 2015 | Sept. 30 2014 |
| | \$ 46 | \$ 42 |

11. Income Taxes (000's C\$) - continued

The current value of all SRED claims net of estimated taxes and allowances is \$8,718 (September 30, 2015 - \$8,516). The Company's claims for SRED credits for the tax years 2005 - 2011 (\$5,506) are currently being challenged by Canada Revenue Agency (CRA). The claim for 2005 will be reviewed by tax court, while claims for 2006 and 2007 are being held in abeyance by CRA pending the outcome of the 2005 claim. Tax years 2008 through to 2011 have received refunds in the amount of \$440 during the prior year and the assessments for these years will be appealed. Final settlement for these claims may take several years to resolve. The 2012 SRED claim (\$889) has not yet been assessed by CRA. The 2013, 2014, 2015 and 2015 SRED tax claims (\$2,627) have been accrued and will be filed with CRA prior to any filing deadlines. The Company's SRED credits are recorded on the balance sheet after review of the relevant accounting pronouncements. A further \$136 has been accepted by the IRS and will be paid when the US subsidiary has taxes payable in the United States.

12. Interests in Joint Ventures and Other Entities (000's C\$)

The Company has a joint venture operating as Bradley Steel Processors Inc. and miscellaneous minority interests in various entities.

The summarized financial information of the Company's share of the investments in joint ventures and other entities is as follows:

| | Dec. 31 2015 | Sept. 30 2015 |
|-------------------------------------|-----------------|------------------|
| Balance sheet information | | |
| Assets | | |
| Current | \$ 4,125 | \$ 4,215 |
| Non-current | <u>195</u> | <u>187</u> |
| Total Assets | \$ 4,320 | \$ 4,402 |
| Liabilities | | |
| Current | \$ 238 | \$ 418 |
| Non-current | <u>1</u> | <u>-</u> |
| Total Liabilities | 239 | 418 |
| Equity | 4,081 | 3,984 |
| Total Liabilities and Equity | \$ 4,320 | \$ 4,402 |

Income statement information

| | Q1 2016 | Q1 2015 |
|-------------------------------------|----------|----------|
| Revenues | \$ 1,063 | \$ 1,003 |
| Profit from continuing operations | \$ 132 | \$ 135 |
| Net income and comprehensive income | \$ 97 | \$ 96 |

Other information

| | | |
|---|-------|-------|
| Dividends received from joint ventures and other entities | \$ 1 | \$ - |
| Depreciation | \$ 2 | \$ 3 |
| Income tax expense | \$ 36 | \$ 35 |

13. Long Term Debt (000's C\$)

| | Dec. 31 2015 | Sept. 30 2015 |
|---|-----------------|------------------|
| Heloval Holdings Ltd., bearing interest of 1.5% due on demand | \$ 2,768 | \$ 2,669 |
| | <u>-</u> | <u>-</u> |
| | 2,768 | 2,669 |
| Less: Current portion | - | - |
| Long term portion | <u>\$ -</u> | <u>\$ -</u> |

The loan with Heloval Holdings Ltd. is secured by company assets.

Principal payments over the next five years are as follows:

| | |
|------|----------|
| 2016 | \$ 2,768 |
| 2017 | Nil |
| 2018 | Nil |
| 2019 | Nil |
| 2020 | Nil |

Notes to Consolidated Financial Statements

14. Capital Stock and Options (000's C\$)

Authorized, an unlimited number of Class A & B common shares.

| | December 31, 2015 | | Sept. 30, 2015 | |
|-----------------------|-------------------|-----------|----------------|----------|
| | Shares | | Shares | |
| Issued Class A common | 25,000 | \$ 30,000 | 25,000 | \$30,000 |

There are no options outstanding as of December 31, 2015 nor September 30, 2015.

15. Related Party Transactions (000's C\$)

| | Dec. 31 2015 | Sept. 30 2015 |
|--|--------------|---------------|
| Accounts receivable from controlling shareholder | \$ 9,254 | \$ 13,143 |
| Accounts payable to controlling shareholder | 6,008 | 6,351 |

| | Q1 2016 | Q1 2015 |
|--|----------|----------|
| Net sales to controlling shareholder | \$ 1,280 | \$ 2,083 |
| Net purchases from controlling shareholder | 3 | - |

All transactions with related parties are recorded at the exchange amount agreed to by the related parties. The advances to the shareholder were made in the normal course of trade and have no specific terms of repayment.

Compensation of Key Management

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company. The Board of Directors and Executive Committee are key management personnel. The following table details the compensation paid to these key management personnel (note - no amounts were paid for post-retirement benefits nor were there any share based payments):

| | Q1 2016 | Q1 2015 |
|---|---------|---------|
| Salaries, fees and short term employee benefits | \$ 471 | \$ 601 |

16. Interest Paid (000's C\$)

| | Q1 2016 | Q1 2015 |
|----------------|---------------|---------------|
| Operating loan | \$ 655 | \$ 744 |
| Long term debt | 9 | 34 |
| | <u>\$ 664</u> | <u>\$ 778</u> |

Interest expense includes interest on bank indebtedness, long term debt, floor plan interest and interest on taxes payable.

17. Expenses by nature (000's C\$)

| | Q1 2016 | Q1 2015 |
|------------------------------------|------------------|------------------|
| Raw materials and consumables used | \$ 30,241 | \$ 42,006 |
| Depreciation and amortization | 844 | 1,077 |
| Personnel expenses | 16,128 | 17,193 |
| Freight | <u>1,323</u> | <u>1,505</u> |
| | <u>\$ 48,536</u> | <u>\$ 61,781</u> |

18. Segmented Information (000's C\$)

| | Q1 2016 | | | |
|---------------------------------|-----------|----------|-----------|----------|
| | Canada | U.S. | CIS | Other |
| Revenue | \$ 16,407 | \$ 2,332 | \$ 10,829 | \$ 6,730 |
| Net loss and comprehensive loss | (3,930) | (558) | (2,594) | (1,612) |
| Property, plant, and equipment | 14,355 | 7,964 | 167 | - |
| Intangible assets | - | - | - | - |

| | Q1 2015 | | | |
|-------------------------------------|-----------|-----------|----------|----------|
| | Canada | U.S. | CIS | Other |
| Revenue | \$ 24,924 | \$ 24,546 | \$ 2,809 | \$ 7,859 |
| Net income and comprehensive income | 626 | 617 | 71 | 198 |
| Property, plant and equipment | 15,935 | 8,503 | 167 | - |
| Intangible assets | - | 64 | - | - |

CIS is the Commonwealth of Independent States, including Russia, Kazakhstan and Ukraine.

The Company has organized its business between agricultural and non-agricultural operations due to the differences in the products and approaches in marketing and manufacturing in both segments. The agricultural equipment segment produces a wide variety of agricultural equipment, whereas the non-agricultural operations consist primarily of custom metal fabrication.

18. Segmented Information (000's C\$) - continued

| | Q1 2016 | | Q1 2015 | |
|-------------------------------------|-----------|--------|-----------|--------|
| | Ag | Non-Ag | Ag | Non-Ag |
| Revenue | \$ 36,172 | \$ 126 | \$ 59,987 | \$ 151 |
| Interest income | 5 | 16 | 69 | 16 |
| Interest expense | 878 | - | 843 | - |
| Net income and comprehensive income | (8,966) | 272 | (1,203) | 2,715 |
| Assets | 325,732 | 10,004 | 347,847 | 9,552 |

The accounting policies of the segments are the same as described in the significant accounting policies. The Company accounts for inter-segment sales at current market prices. Revenue from the top two customers were \$5.2 million and \$2.3 million, both in the agricultural segments. For the same period of fiscal 2015, the top two customers were \$5.4 million and \$3.7 million, also both in the agricultural segments.

19. Deferred Profit Sharing Plan

In 1995, the Company established a Deferred Profit Sharing Plan for its employees. The Company can contribute funds to the plan annually as determined by the Board of Directors, subject to certain maximum limits established by the plan. Contributions are used to purchase common shares of the Company for the employees from the plan trust. The plan trust owns approximately 250,500 Buhler Industries Inc. shares. During the period, the Company contributed \$Nil to the plan (2015 - \$Nil).

20. Contingent Liability (000's C\$)

In a prior year, a loan from Industry Canada in the amount of \$9,300 was forgiven. Should the Company fail to maintain certain tractor production levels in Winnipeg until October 22, 2017, \$5,000 of the amount forgiven may become payable by the Company.

As at December 31, 2015, the Company was in compliance with this requirement, and management believes that productions levels will continue to be met during the time period set out in the contract with Industry Canada.

21. Capital Management

The Company's fundamental objectives in managing capital are to maintain financial flexibility in order to preserve its ability to meet financial obligations, ensure adequate liquidity and financial flexibility at all times, and deploy capital to provide an appropriate investment return to its shareholders while maintaining prudent levels of financial risk. The Company believes that the aforementioned objectives are appropriate in the context of the Company's business.

The Company defines its capital as cash, bank indebtedness, shareholders' equity, long-term debt including the current portion, net of any cash and cash equivalents. The Company's financial strategy is designed to maintain a flexible capital structure consistent with the objectives stated above and to respond to changes in economic conditions and the risk characteristics of underlying assets. In order to maintain or adjust its capital structure, the Company may purchase shares for cancellation pursuant to normal course issuer bids, issue new shares, raise debt (secured, unsecured, convertible and/or other types of available debt instruments), enter into hedging arrangements and refinance existing debt with different characteristics, amongst others.

The Company constantly monitors and assesses its financial performance and economic conditions in order to ensure that its net debt levels are prudent.

The Company's financial objectives and strategy are reviewed on an annual basis. The Company believes that its ratios are within reasonable limits, in light of the relative size of the Company and its capital management objectives.

As part of the lending agreements for the financing facility, the Company is subject to certain quarterly covenants. In light of the losses in the quarter, the Company was not in compliance with the EBITDA covenant. The Company has received a waiver on this covenant for the year ended September 30, 2015 and continues to work with the lenders in monitoring these covenants. The Company has not received a waiver related to future periods. A future violation of these covenants could have a material impact on the financial statements of the Company. Accordingly, management is in ongoing discussions with the lenders.

There are no externally imposed capital restrictions on the Company.

There were no changes in the Company's approach to capital management during the year.

Notes to Consolidated Financial Statements

22. Financial Instruments (000's C\$)

The following presents the carrying value and fair value of the Company's financial instruments:

| Financial Asset/Liability | Classification | December 31, 2015 | |
|--|-----------------------|------------------------------------|-------------------------|
| | | Carried at cost/ Amortized cost | Carrying/ Fair Value |
| Bank indebtedness | Loans and receivables | \$ (75,158) | |
| Accounts receivable | Loans and receivables | 53,558 | |
| Long term receivables | Loans and receivables | 2,187 | |
| Interest in other entities | FVTPL | | 161 |
| Accounts payable and accrued liabilities | Other liabilities | (77,925) | |
| Long term debt | Other liabilities | (2,768) | |
| September 30, 2015 | | | |
| Financial Asset/Liability | Classification | Carried at cost/ Amortized cost | |
| | | Carrying/ Fair Value | |
| Bank indebtedness | Loans and receivables | \$ (52,830) | |
| Accounts receivable | Loans and receivables | 73,103 | |
| Long term receivables | Loans and receivables | 2,187 | |
| Interest in other entities | FVTPL | | 160 |
| Accounts payable and accrued liabilities | Other liabilities | (93,055) | |
| Long term debt | Other liabilities | (2,669) | |

Financial instruments include cash/bank indebtedness, accounts receivable, derivative financial instruments, long term receivables, interests in other entities not subject to significant influence, accounts payable and accrued liabilities, advances from related party and long term debt. Except for the long term receivables, interests in other entities and long term debt, the carrying values of these financial instruments approximate fair value due to the short term nature of the financial instruments or they are carried at fair value.

The Company has classified its interest in other entities as FVTPL. These shares are not actively traded in a quoted market and accordingly fair value has been estimated to be cost.

The fair value of the derivative financial instruments has been estimated based on current market rates for such vehicles, which is impacted by the current exchange rate between the Canadian and US dollars. The estimated fair value of the derivative financial instruments as at December 31, 2015 is \$Nil (September 30, 2015 - \$Nil).

The fair value of the long term receivables and long term debt is impacted by changes in market yields which can result in differences between the carrying value and fair value of the instruments.

The fair value of long term receivables has been estimated based on the current market rates for long term bonds with similar terms and conditions. The estimated fair value of long term receivable as at December 31, 2015 is \$1,425 (September 30, 2015 - \$1,862).

The fair value of long term debt has been estimated based on the current market rates for long term debt with similar terms and conditions. The estimated fair value of long term debt payable as at December 31, 2015 is \$2,763 (September 30, 2015 - \$2,698).

The Company categorizes its fair value measurements of financial instruments according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1 – fair value measurements that reflect unadjusted, quoted prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date.

Level 2 – fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable market data. The fair values of other entities and long term receivables are disclosed at fair value based on a level 2 classification.

Level 3 – fair value measurements using significant non-market observable inputs. These include valuations for assets and liabilities that are derived using data, some or all of which is not market observable data, including assumptions about risk. The Company does not have any financial instruments measured at fair values based on level 3 inputs.

23. Financial Risk Management (000's C\$)

The Company's risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance. The Company manages its risks and risk exposures through a combination of insurance, a system of internal and disclosure controls and sound business practices.

Risk management is primarily the responsibility of the Company's corporate finance function. Significant risks are regularly monitored and actions are taken, when appropriate, according to the Company's approved policies, established for that purpose. In addition, as required, these risks are reviewed with the Company's Board of Directors.

Interest Rate Risk

The Company's interest rate risk arises from its variable rate bank indebtedness and long term debt. The long-term debt is either interest-free or very low rate, and therefore carries minimal interest rate risk. As the bank indebtedness is all variable rate, the Company is exposed to a certain level of interest rate risk. Management feels that these risks are manageable as the interest rate on this debt is less than prime and therefore has not entered into any instruments to mitigate this risk. Based on the level of bank indebtedness outstanding at December 31, 2015, a 1% increase/decrease in the rate being charged to the Company would result in a \$565 (Q1 2015 - \$659) decrease/increase in net earnings.

Commodity Price Risk

The Company's manufacturing costs are affected by the price of raw materials, namely steel. In order to manage its risk, the Company applies a steel surcharge to its product when the cost of steel increases significantly. The Company's preferred practice is to match raw materials cost changes with selling price adjustments, although there is a time lag. This matching is not always possible, as customers react to selling price pressures related to raw material price fluctuations according to conditions pertaining to their markets.

Foreign Exchange Risk

The Canadian dollar is the Company's functional currency. The Company operates primarily in Canada and the United States. The reporting currency of the Company is Canadian dollars, whereas the functional currency for operations in the United States and sales to the CIS region are the U.S. dollar. Fluctuations in the exchange rate between the U.S. dollar and Canadian dollar will affect the Company's reported results. However, the impact of changes in foreign exchange rates on the Company's reported results differs over time depending on whether the Company is generating a net cash inflow or outflow of Canadian dollars. This is largely dependent on the Company's revenue mix by currency as operating costs denominated in Canadian dollars have been relatively stable.

In addition, translation differences arise when foreign currency monetary assets and liabilities are translated at foreign exchange rates that change over time. These foreign exchange gains and losses are recorded in revenues. As a result of the Company's U.S. dollar net monetary position within the Canadian dollar reporting currency operations through to December 31, 2015, a one-cent strengthening/weakening in the year-end foreign exchange rate from Canadian dollars to U.S. dollars would have decreased/increased net earnings by \$85 for 2016 (Q1 2015 - \$245).

The Company is insulated from large foreign exchange gains and losses by virtue of its mix of cash inflows and outflows in U.S. dollars. Gains and losses generated by fluctuations in the exchange rates used to translate U.S. dollar assets are offset by similar gains and losses on U.S. dollar liabilities. The Company also uses forward contracts to further mitigate these fluctuations when the natural hedges are forecasted to be insufficient.

As at December 31, 2015, the Company had no US to Canadian dollar foreign currency forward contracts with a notional amount of US \$Nil in place (September 30, 2015 - \$Nil). Fair value adjustments are recognized within (gain) loss on foreign exchange in the consolidated statement of comprehensive income.

Liquidity Risk

Investments to drive growth can require significant financial resources. A range of funding alternatives is available to the Company including cash on hand, cash flow provided by operations, additional debt, the issuance of equity or a combination thereof. The low level of outstanding debt and an informal investment grade credit rating allow the Company to enjoy relatively low interest rates. The Company has determined that total current credit facilities of \$110,000 are adequate. In light of the loss in 2015, the Company was not in compliance with the EBITDA covenant. The Company has received a waiver on this covenant for the year ended September 30, 2015 and continues to work with the lenders in monitoring these covenants. The Company has not received a waiver related to future periods. A future violation of these covenants could have a material impact on the financial statements of the Company. Accordingly, management is in ongoing discussions with the lenders.

Notes to Consolidated Financial Statements

24. Financial Risk Management (000's C\$) - continued

The 2016 requirements for capital expenditures, working capital and debt repayments can be financed from cash resources, cash flow provided by operating activities and unused credit facilities. The following table outlines the maturity analysis of the Company's financial liabilities:

| | 2016 | 2017 | 2018 | 2019 | 2020 | Post 2020 | Total |
|--|-----------|------|------|------|------|--------------|-----------|
| Accounts payable and accrued liabilities | \$ 77,925 | \$ - | \$ - | \$ - | \$ - | \$ - | \$ 77,925 |
| Long term debt | 2,768 | - | - | - | - | - | 2,768 |
| Total | \$ 80,693 | \$ - | \$ - | \$ - | \$ - | \$ - | \$ 80,693 |

Credit Risk

Credit risk arises from cash held with banks and credit exposure to customers, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets.

The objective of managing counterparty credit risk is to prevent losses on financial assets. The Company assesses the credit quality of counterparties, taking into account their financial position, past experience and other factors. Management regularly monitors customer credit limits, performs credit reviews and, in certain cases insures accounts receivable balances against credit losses.

The carrying amount of accounts receivable is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of comprehensive income within selling and administrative expenses. When a receivable balance is considered uncollectible, it is written off against the allowance for accounts receivable. Subsequent recoveries of amounts previously written off are credited against selling, general and administrative expenses in the statement of comprehensive income.

The following table sets out the aging details of the Company's accounts receivable balances outstanding based on the status of the receivable in relation to when the receivable was due and payable and related allowance for doubtful accounts:

| | Dec. 31, 2015 | Sept. 30, 2015 |
|---|---------------|----------------|
| Current - neither impaired nor past due | \$ 40,288 | \$ 59,658 |
| Not impaired but past the due date: | | |
| Within 30 days | 4,104 | 6,665 |
| 31-60 Days | 2,986 | 1,222 |
| Over 60 days | 6,356 | 5,728 |
| | <u>53,734</u> | <u>73,273</u> |
| Less: Allowance for doubtful accounts | (176) | (170) |
| Total receivables, net | \$ 53,558 | \$ 73,103 |

The following table details the continuity of the allowance for doubtful accounts:

| | Q1 2016 | Q1 2015 |
|--|----------|----------|
| Balance, beginning of year | \$ (170) | \$ (339) |
| Provisions for the year, net of recoveries | - | - |
| Uncollectible amounts written off | - | - |
| Foreign exchange impact | (6) | (13) |
| Balance, end of year | \$ (176) | \$ (352) |

25. Financial Statement Presentation

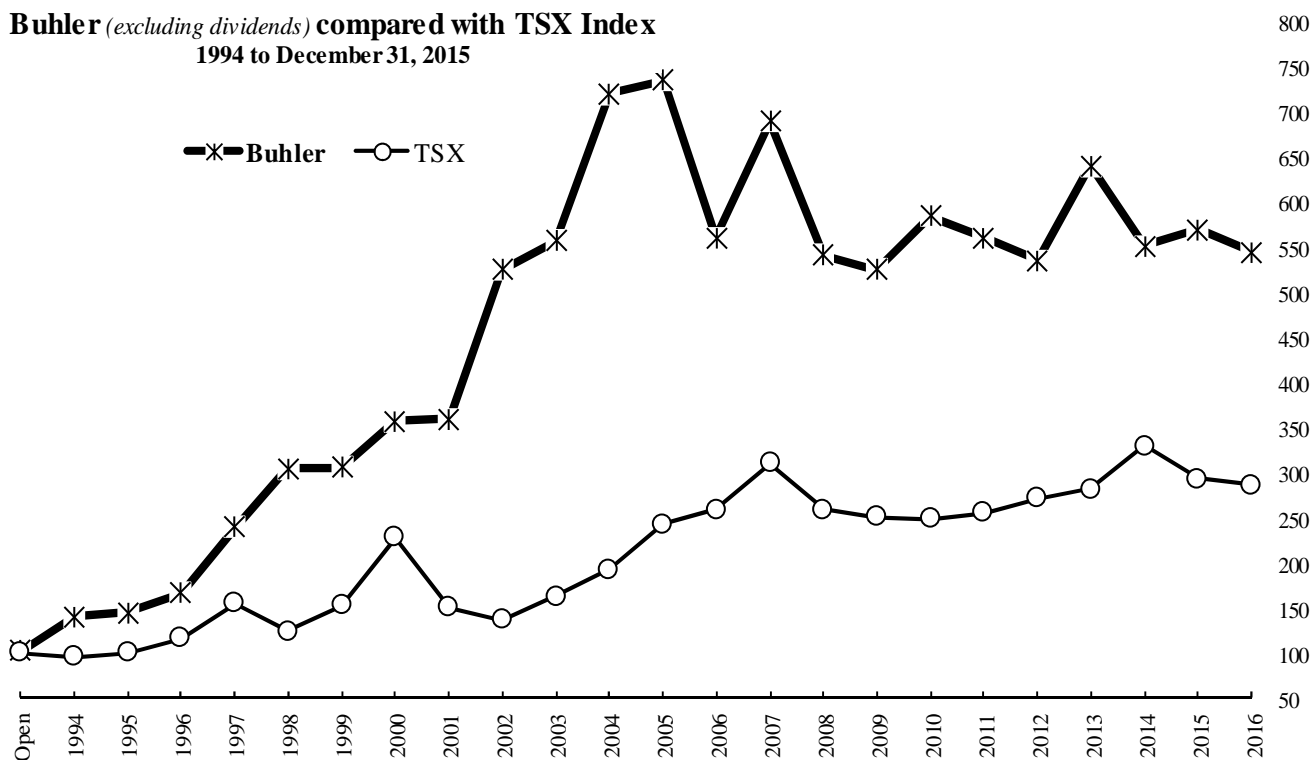

Certain balances in the prior year have been reclassified to conform with financial statement presentation of the current year.
